FROM THE CEO'S DESK

Sapna Moudgil

Chief Executive Officer,
NIIT Foundation

“

BUILDING CYBERSECURITY MINDSET AND SKILLS

India is seeing a quiet but powerful shift in the way people **learn, work, communicate, and access essential services**. We are in a hurry to go online - because digital feels like the fastest, smartest way forward. And in many ways, it is. With millions of new users coming online each year, digital access has opened doors to opportunity like never before, but every time a new door opens, there is also someone waiting on the other side.

Those who scam are often the first to adapt to new technology. They move quickly, deliberately, and with intent — counting on the fact that many users are still learning. We see this every day: so-called digital arrests, increasingly sophisticated ways of extracting OTPs, cloned WhatsApp chat windows that look uncannily real. These are not random acts. They are well thought out, constantly evolving, and deeply serious.

This is why safety in cyberspace can no longer be seen as a niche or technical skill. It is a life skill. Whether it is a student attending online classes, a woman entrepreneur using digital payments, an elderly person staying in touch with family, or a first-time smartphone user exploring the internet - each faces unique risks. **Cyber fraud, misinformation, unsafe online behaviour, and low awareness** continue to affect communities, especially those from underserved backgrounds.

Yes, progress has been made. In addition to the awareness driven by the Government institutions like **RBI and National Safety Council of India (NSCI)**, NIIT Foundation has skilled more than **17 Lakh people** on cyber security. But this is still a drop in the ocean. but that is still a drop in the ocean.

There is much more to do. Every CSR programme that uses technology must ensure it is cyber-safe. Every organisation working with digital tools must ask itself: are we protecting the people we aim to empower? And are our NGO partners equally safe in the cyber space? Digital inclusion without digital safety is incomplete. The time to act is now.

COVER STORY

CYBERSECURITY IS NOT ONLY ABOUT PROTECTION – IT IS ABOUT CONFIDENCE, OPPORTUNITY, AND FUTURE READINESS.

As India grows more digital, citizens are increasingly using online platforms for communication, payments, learning, and essential services. This opportunity also comes with rising digital risks — fraud, identity theft, misinformation, and unsafe online behaviour. First-time users, gig workers, and low-digital-literacy communities often carry the highest risk. Building a cybersecurity mindset has become a fundamental requirement for safe and confident digital participation.

NIIT Foundation's mission is to create awareness and career pathways in cybersecurity. Our customised delivery model meets learners wherever they are. Short **2-hour modules** support beginners, gig workers, and individuals with limited time, offering practical steps to stay safe online. For students, jobseekers, and youth exploring technology careers, our 8–10 hour structured sessions dive deeper into real-world threats, safe practices, and an introduction to cybersecurity roles. Online formats ensure that learning continues regardless of location or schedule.

Our commitment to inclusion shapes everything we design. Women, senior citizens, persons with disabilities, LGBTQI+ individuals, rural communities, and low-income groups often face greater digital vulnerabilities. Our trainers tailor examples, language, and teaching styles to each group's reality, making cybersecurity feel accessible rather than intimidating.

Cybersecurity is also a source of employability and upward mobility. With India's growing need for cybersecurity professionals, our advanced modules and counselling support have enabled **over 25 thousand placements**, helping learners take their first steps into this emerging field.

To date, the Cyber Suraksha initiative has reached **over 17 Lakhs learners**. Through strong partnerships with both government and private organisations, we continue expanding our reach and strengthening India's digital safety ecosystem.

CYBERSECURITY THAT SPEAKS EVERY LANGUAGE

It is now available in 8 languages:

- Hindi
- Bangla
- Tamil
- Telugu
- Kannada
- Marathi
- Odia
- English

GENDER-INCLUSIVE APPROACH

Women continue to be underrepresented in cybersecurity. Cyber Suraksha actively encourages their participation through targeted mobilization, relatable examples, and safe learning spaces.

- Digital safety must be inclusive.
- Digital opportunity must be shared.

CASE STUDIES

The Virtual Shield: Saloni's Path to Cyber Awareness

Saloni Jain, a second-year B.Tech IT student from Indore, had already built a strong academic foundation, excelling in programming languages such as **C, C++, Python, SQL, HTML, and CSS**. Despite her achievements, Saloni recognised a critical gap—her curriculum offered limited exposure to practical cybersecurity skills, even as digital risks continued to grow.

Determined to bridge this gap, Saloni enrolled in a cybersecurity internship with NIIT Foundation in collaboration with Cisco. Courses such as **Introduction to Cybersecurity, Cybersecurity Essentials, and Introduction to Packet Tracer** marked a decisive shift in her learning journey. The programme helped her move beyond theory to hands-on experience in threat identification, network security, and real-world problem-solving.

More than technical competence, the internship nurtured a proactive cybersecurity mindset. Saloni began advocating digital safety within her academic environment, sharing knowledge with peers and contributing to safer network practices. The experience boosted her confidence and positioned her as a well-rounded technology professional, capable of adapting to industry expectations.

Balancing academics, sports, and personal interests, Saloni's journey highlights how structured skilling programmes can transform curiosity into capability—equipping young learners to thrive in an increasingly security-driven digital economy.

"The Cisco Program has been amazing! I've learned so much, gained new skills, and become passionate about tech and cybersecurity. I'm excited to use my knowledge to make a difference and take my career to the next level."

CASE STUDIES

Story of Kunwar Anand Singh From Cyber Victim to Community Advocate

Kunwar Anand Singh, a 50-year-old teacher from Sagarpur, Delhi, encountered cyber threats firsthand—unauthorised bank transactions, email and social media account hacking, and online fraud attempts. These experiences revealed how vulnerable even informed individuals can be in the digital space. Rather than retreating from technology, Kunwar Anand chose to understand it.

His journey took a decisive turn when he joined the **Cyber Suraksha Kavach Programme** by NBT Newspaper, contributing to cyber awareness through articles. To deepen his understanding, he enrolled in the Cyber Security Programme by NIIT Foundation and Cisco, where he learned about fraud techniques, online risks, and preventive measures. Guided by his mentors, he developed practical strategies to protect personal data and remain vigilant online.

Today, Kunwar Anand applies these lessons in his own life and actively shares them with others. Through writing and community outreach, he encourages caution, awareness, and responsible digital behaviour—creating a ripple effect of cybersecurity consciousness among readers and peers.

“The knowledge gained from the NIIT Foundation and **Cisco program** has been life-changing. I am thankful to **Ms. Muskan Singh and Mr. Mohit Kanojia** for motivating me to join and explaining the importance of cyber security in today’s digital world.”

VOLUNTEER SPEAK

Shwetha Koppal

Volunteer, NF Center
Jalahalli, Bangalore

My experience with NF has been both enriching and professionally rewarding. Working closely with students, supporting their learning journeys, and being part of a purpose-driven environment made this association truly meaningful. NF provides a well-structured platform where learning goes beyond technical skills and emphasizes communication, confidence, and career readiness. My contribution has been independent, not as an employee, but in a senior digital leadership role, drawing on my experience in public technology forums, academic initiatives, and encouraging students to pursue **STEM education and technology entrepreneurship**.

I conducted interactive sessions, mentored students through group discussions and mock interviews, and guided them in choosing technologies aligned with their career goals. The collaborative culture and openness of the NF team made every interaction impactful. I particularly valued the focus on holistic development, including goal setting and professional profile building, which are essential for preparing students for real-world challenges.

This engagement strengthened my leadership perspective at the intersection of **technology, education, and social impact**. It has been both meaningful and professionally fulfilling, and I remain committed to supporting NF's mission through thoughtful, scalable, and execution-focused digital leadership.

PARTNER TESTIMONIAL

Bijay Kumar Pandey

CSR Head
Sleepwell Foundation

Partnering with NIIT Foundation (NF) has been an enriching experience defined by their **unwavering commitment to real, measurable grassroots impact**. Across every interaction, the NIIT Foundation team displays a rare blend of professionalism, empathy, and purpose-driven action. NF doesn't merely run programs; it builds sustainable pathways that empower individuals, families, and entire communities.

What truly impresses me is the NIIT Foundation's ability to translate complex social challenges into practical, scalable solutions. **NF's training models** are thoughtfully designed, culturally grounded, and accessible, ensuring that even learners with limited exposure to formal opportunities in places like remote Khurja can thrive. Witnessing this transformation—seeing learners at SWF Skill Development Centre, Khurja arrive with hesitation and leave with confidence, employability, and a renewed sense of possibility—is profoundly rewarding.

Distinctive in its spirit of partnership, NF listens, adapts, and co-creates to ensure every initiative aligns with on-the-ground realities. It is rare to find an organization that effectively combines high-level vision with such grounded execution.

My experience has been nothing short of inspiring, and I eagerly look forward to continuing this meaningful collaboration.

NEWS & EVENTS

On 15th Oct, **NIIT Foundation & AngelOne** organized a Tree Plantation Activity at Rakhiyal Municipal Urdu Madhyamik Shala in Gujarat, supporting Climate Action

NIIT Foundation organized an On-Campus Placement Drive on 28th Oct at Bon Maharaj Institute, Vrindavan, under the **Infosys Springboard Livelihood Program**

The HiWEL Learning Station at **Deepalaya**, Okhla(Delhi), celebrated 'Light, Learn & Grow Together for a Green Diwali' on 15th Oct, showcasing creativity, innovation, and sustainability

The **Cisco Cyber Suraksha Plus Program** was launched on 17th Nov 2025 in Sitarganj, Uttarakhand, to strengthen ITI students' digital foundation

On 25th Nov 2025, the **Angel One program** hosted a Certificate Ceremony in Ahmedabad, celebrating 105 learners, with Sumit Bhukania from NIIT Foundation felicitating the occasion

A team of 20 students from CDC Gurgaon Sec-21 visited **Hughes Systique** on 12th Nov, receiving hands-on corporate exposure and guidance from industry professionals

The first **SBIF LEAP** batch was launched on 30th Oct 2025 at Hayathnagar with a lamp-lighting ceremony, graced by Sanjay Prakash, Swapan Dhar, and Dr. Charu Kapoor

MoU was signed on 17th Dec 2025 by Mr. Amar Gupta(NIIT Foundation) and Dr. Om Prakash Bairwa (Commissionerate of College Education, Rajasthan) for Cybersecurity and AI employability programs

On 18th Dec 2025, Principal Ms. Pratima Kanwat inaugurated an IT Lab at SKV Raj Nagar-II, Delhi, set up by NIIT Foundation under the **BPCL** Project, with virtual participation from SKV Chhawla and SBV Bharthal

On **5th Dec 2025**, at **AISS 2025**, NIIT Foundation was represented by Vikram Kumar alongside Geetanjali Gaur, Shubhi Takkar, and Robin Sarkar, highlighting cybersecurity in digital literacy

Cyber Suraksha Plus Milestone Event, held on 9th Dec 2025 in Mumbai, marked the empowerment of 1.5 million learners with essential Cyber Safety Skills

CHECKMATING CYBER THREATS: VISWANATHAN ANAND AND NIIT FOUNDATION TEAM-UP TO SECURE INDIA

NIIT Foundation marked a significant milestone in its cybersecurity journey with the onboarding of five-time World Chess Champion and Padma Vibhushan awardee Viswanathan Anand as the Ambassador for its cybersecurity awareness initiatives under Cyber Suraksha Plus. Anand's association brings a powerful, relatable voice to NIIT Foundation's mission of promoting safe and responsible digital behaviour across India.

"Chess teaches us that foresight, preparation, and vigilance are key to avoiding traps, and the same applies to the digital world. I'm delighted to join NIIT Foundation in empowering people with the knowledge and confidence to stay secure online. Together, we can help India think strategically and act safely in its digital journey."

- **Grandmaster Viswanathan Anand.**

Cyber Suraksha Plus represents the advanced phase of NIIT Foundation's national cybersecurity skilling and awareness programme, recognising cybersecurity not merely as a technical capability, but as an essential life skill. The initiative focuses on equipping youth and vulnerable communities with the awareness, confidence, and pathways needed to navigate an increasingly digital world safely.

Reflecting on the significance of the collaboration, **Sapna Moudgil, CEO, NIIT Foundation**, noted: "Cybersecurity is not just a technical skill but a civic responsibility. Through Grandmaster Anand's association, we hope to bring this message closer to every household—encouraging people to think ahead, anticipate risks, and safeguard their digital presence with the same strategy and discipline that defines his game."

Building on the success of the original Cyber Suraksha programme—which has already trained over **15 lakh learners** - Cyber Suraksha Plus now aims to reach **27 lakh learners by 2028**, progressing from awareness to specialised career tracks in AI-driven security, system protection, and ransomware defence.

“DIGITAL SAFETY IS DEFINITELY SOMETHING WE ALL NEED TO THINK ABOUT” – VISWANATHAN ANAND

FUTURE-READY IMPACT WORKSHOP

EXPERIENCING HUMANITY, TECHNOLOGY, & INCLUSION

NIIT Foundation hosted the **Future-Ready Impact: Humanity, Technology, and Inclusion** experiential workshop in New Delhi, bringing together CSR leaders, policymakers, educators, and development practitioners for a deeply immersive engagement. Designed as a participatory convening rather than a presentation-led event, the workshop allowed participants to experience NIIT Foundation's on-ground methodology through interactive learning zones, simulation stations, and real-time problem-solving activities.

Anchored in four core pillars - **SDG-aligned outcomes, community-centred design, AI-enabled solutions**, and a whole-person approach - the workshop showcased interventions across education, skilling, livelihoods, and inclusion, including the Digital Bus, HiWEL kiosks, Career Development Centres, and inclusive skilling programs.

The workshop featured a virtual special address by Shri Sujeeet Kumar, Hon'ble Member of Parliament (Rajya Sabha), who underscored the importance of ensuring technology reaches rural and underserved communities meaningfully. A fireside conversation with NIIT Foundation leadership further explored the intersection of policy, technology, and inclusive impact, reinforcing that scalable change must remain human-centred.

FUTURE READY IMPACT

GLIMPSES OF THE FUTURE READY IMPACT WORKSHOP

Interactive learning zones and activity-led sessions

Group-based exercises encouraging peer learning

Facilitated discussions and real-time problem-solving

Whole-Person Approach - Integrating life skills, values, agency, and well-being

Hands-on tasks designed to simulate real-world scenarios

A fireside chat with Sapna Moudgil, CEO, NIIT Foundation and Raju Rajendran, Non Executive Director, NIIT Ltd.

A virtual special address by Shri Sujeet Kumar, Hon'ble Member of Parliament (Rajya Sabha)

NIIT foundation and Cisco unveil 'Cyber Suraksha Plus' to train 27 lakh citizens in AI and cloud-driven cybersecurity by 2028

Reports/White Papers / By ET Edge Insights / November 3, 2025

NIIT Foundation, a non-profit organization in partnership with Cisco since 2022, has trained over 10 lakh learners across 27 states and 5 union territories, with nearly 40% of participants being females. This initiative has enabled over 7,000 youth to embark on careers in cybersecurity. The program has also reached vulnerable groups such as senior citizens, persons with disabilities, frontline workers, and members of the LGBTQIA+ community, helping them navigate digital spaces more securely.

The CSR Journal – 3rd Nov

Cyber Suraksha Plus marks a new phase, expanding from cyber awareness to structured career pathways in system protection, ransomware defense, AI-driven security, and cloud protection. Designed to be multilingual and inclusive, it aims to train 27 lakh learners by 2028 and help bridge India's cybersecurity talent gap.

The human firewall: India's next frontier in digital security

Cyber Security, Opinion / By Aruna Sharma and Harish Krishnan / November 15, 2025

The Fourth Industrial Revolution is actively reshaping expectations, industries, governance, and livelihoods. In this era of artificial intelligence, the internet of things, automation, and pervasive connectivity, India finds itself in a favourable position. With one of the youngest populations, a growing digital infrastructure, surging start-up growth, and increasing global tech investment, the country is poised to lead—not only in scale but in secure, resilient digital adoption. The question is no longer whether India can digitize fast enough; the more urgent question is whether it can digitize securely, anchored by citizens who are cyber-aware and empowered.

ET Edge Insights – 15th Nov

The Fourth Industrial Revolution is reshaping industries, governance, and livelihoods. With a young population, strong digital infrastructure, rapid start-up growth, and rising global tech investment, India is well positioned to lead in secure digital adoption. The challenge now is not how fast India can digitize, but how securely—powered by cyber-aware and empowered citizens.

Skill training helps T women bag jobs

Nirupa Sathy Sree Vatyam / Oct 09, 2025, 05:32 IST

Hyderabad: Many women from Mahabubnagar district are getting placed as data entry operators, technical assistants, and customer relations executives, earning a decent living after pursuing skill development programmes.

As many as 317 women, aged between 18 and 30, completed certified training in IT, customer service, digital literacy, and other fields. Many of them, once homemakers, farm workers, or part of the unorganised sector, have now secured jobs in reputed firms and are contributing to their families' financial stability.

"Travelling three hours daily for training and working on the farm was not easy, but I was determined. I knew this was my chance to build a better future, so I gave it my all," said Asma Begum, who secured a job as a data entry operator at the sub-registrar's office in Narayanpet district.

Why Classrooms Must Teach AI, Ethics and Cybersecurity Together

BW Online Bureau | Oct 24, 2025

As India races ahead in artificial intelligence and digital growth, the next generation must be equipped not just to code, but to care and defend

Walk into a typical school today, and you might see students using online tools to solve problems, look up information, or even get suggestions generated by algorithms. But what students rarely learn is how these tools work, who designs them, or how safe they are. In the fast-changing digital world, education must evolve: students need to know how to build, why to care, and how to guard. That is why AI, ethics and cybersecurity must form the backbone of future education.

BW LEGAL WORLD – 24th Oct

In today's classrooms, students use digital tools but rarely learn how they work, who creates them, or how safe they are. As technology evolves, education must too — **AI, ethics, and cybersecurity** should form the core of future learning.

Empowering youth through real-world learning

Vikram Kumar

Hans News Service | 30 Oct 2025 1:08 PM IST

HIGHLIGHTS

Experience-driven education is turning potential into purpose for the next generation

India is at a turning point. Millions of young people are entering the workforce every year, full of ambition and potential. Yet, many find themselves unprepared for the realities of modern industries. The issue isn't a lack of intelligence or enthusiasm—it's a shortage of the right skills. In this context, experiential learning, or learning by doing, is proving to be one of the most powerful solutions to bridge the gap between education and employability.

Also Read - [Pavan Allena's mission to shape the next gen of entrepreneurs from Hyderabad](#)

Experiential learning means applying theoretical knowledge in real-world contexts—through internships, apprenticeships, innovation challenges, volunteering, or entrepreneurial projects. It helps students move beyond rote learning, demanding critical thinking, collaboration, and adaptability. These experiences transform learners from passive recipients of information into active problem-solvers, capable of navigating complex and unpredictable situations.

HANS INDIA – 30 Oct

Experiential learning—learning by doing—bridges this gap by applying theory to **real-world contexts** through internships, apprenticeships, innovation challenges, volunteering, and entrepreneurship.
